Human Resource Management (HRM)

Small, fast growing businesses soon realize that with every additional new employee, management of HR related activities and responsibilities can quickly get out of control. Or, larger companies need to create a project oriented workforce, but don't want it on their books. It's not just simply about relief from managing the payroll. It's about relieving the much larger cost-and-labour-intensive responsibilities of managing your total employee administration including payroll and employment governance, benefits management, government tax and pension compliance and employer liability management, all while tracking vacation and sick time accrual.

How Does Human Resource Management Work?

Human Resource Management is often referred as "employee leasing", since, for those effected employees, "employer of record" responsibility is transferred to BlueSky Personnel Solutions. As a result, we enter into a co-employment relationship with you, our client. Depending upon need, the client typically retains responsibility for recruitment, hiring, workplace supervision and performance management, while we take care of the rest.

Powerful Benefits of BlueSky HR Administration Services

- **Saves Money** - reduced client-side costs and lower employment costs attributable to economies of scale.
- **Strengthened Business Focus** - new freedom to focus upon the strategic issues of growing the client business.
- **More Effective Employees** - improved employee and benefit services leads to a happier and more effective employee workforce.
- **General Workplace Compliance** - provides improved compliance with statutory workplace laws, leading to improved risk protection.

How Can We Help?

If you're looking to reduce costs and to find relief from the morass of non revenue generating HR administration tasks...let's talk.
